

My Health Toolkit VPAT

(Voluntary Product Accessibility Template)

Last Updated: 1/15/2025

Electronic & IT Accessibility Standard	Category	Section 508 Rule	Supporting Features	Exceptions and Remarks	Support Status
1194.21 (a)	Software Applications and Operating Systems	When software is designed to run on a system that has a keyboard, product functions shall be executable from a keyboard where the function itself or the result of performing a function can be discerned textually.	Partially Supported. Keyboard access exists for functions that can be identified with text labels. A mouse or other pointing device is not required for these functions.		Partially Supported
1194.21(b)	Software Applications and Operating Systems	Applications shall not disrupt or disable activated features of other products that are identified as accessibility features, where those features are developed and documented according to industry standards. Applications also shall not disrupt or disable activated features of any operating system that are identified as accessibility features where the application programming interface for those accessibility features has been documented by the manufacturer of the operating system and is available to the product developer.	Partially Supports. Site may interfere with some documented accessibility features of the supported operating systems or other products that follow industry standards.	A control which displays some images and links is not visible when color support is changed in the browser or in the operating system.	Partially Supported
1194.21 (c)	Software Applications and Operating Systems	A well-defined on-screen indication of the current focus shall be provided that moves among interactive interface elements as the input focus changes. The focus shall be programmatically exposed so that assistive technology can track focus and focus changes.	Supported. Site identifies the current focus visually, and allows assistive technology to track changes in focus.		Supported

Electronic & IT Accessibility Standard	Category	Section 508 Rule	Supporting Features	Exceptions and Remarks	Support Status
1194.21 (d)	Software Applications and Operating Systems	Sufficient information about a user interface element including the identity, operation and state of the element shall be available to assistive technology. When an image represents a program element, the information conveyed by the image must also be available in text.	Partially Supports. Some information about user interface elements may not be available to assistive technology. Text equivalents for some program element images may not exist.	Refer to other items marked "Partially Supports" or "Not Supported" for more information.	Supported
1194.21 (g)	Software Applications and Operating Systems	Applications shall not override user selected contrast and color selections and other individual display attributes	Partially Supports. Site may override some user selected contrast and color selections and other individual display attributes set through supported operating systems.	A control which displays some images, is not visible when color support is changed in the browser or in the operating system.	Partial Supported
1194.21(j)	Software Applications and Operating Systems	When a product permits a user to adjust color and contrast settings, a variety of color selections capable of producing a range of contrast levels shall be provided.	Partially Supports. Site supports a variety of color and contrast selections through the supported operating systems, with some exceptions.	A control which displays some images, is not visible when color support is changed in the browser or in the operating system.	Partially Supported
1194.21 (l)	Software Applications and Operating Systems	When electronic forms are used, the form shall allow people using assistive technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Partially Supports. Assistive technology may not access all the information and functions required for completion and submission of electronic forms contained in the application.		Partially Supported

Electronic & IT Accessibility Standard	Category	Section 508 Rule	Supporting Features	Exceptions and Remarks	Support Status
1194.22 (a)	Web-based Intranet and Internet Information and Applications	A text equivalent for every non-text element shall be provided (e.g., via "alt", "longdesc", or in element content).	Partially Supports. Text equivalents exist for non-text elements that are required to comprehend content or to facilitate navigation, with some exceptions.	Some icons and images	Partially Supported
1194.22 (b)	Web-based Intranet and Internet Information and Applications	Equivalent alternatives for any multimedia presentation shall be synchronized with the presentation.	No multimedia presentations are present.	No applicable checkpoints	Not Applicable
1194.22 (c)	Web-based Intranet and Internet Information and Applications	Web pages shall be designed so that all information conveyed with color is also available without color, for example from context or markup.	Supported. All information is conveyed regardless of color.	Visual checks required	Supported
1194.22 (f)	Web-based Intranet and Internet Information and Applications	Client-side image maps shall be provided instead of server-side image maps except where the regions cannot be defined with an available geometric shape.	Supported. Client-side image maps are used instead of server-side image maps	No failures	Supported
1194.22 (g)	Web-based Intranet and Internet Information and Applications	Row and column headers shall be identified for data tables.	Row and column headers contain identifying information that is available to assistive technology.	No failures	Fully Supported
1194.22 (h)	Web-based Intranet and Internet Information and Applications	Markup shall be used to associate data cells and header cells for data tables that have two or more logical levels of row or column headers.	Markup is used to associate data and header cells, however there are warnings.	Tables use markup to associate data and header cells, but have no summary	Supported

Electronic & IT Accessibility Standard	Category	Section 508 Rule	Supporting Features	Exceptions and Remarks	Support Status
1194.22 (j)	Web-based Intranet and Internet Information and Applications	Pages shall be designed to avoid causing the screen to flicker with a frequency greater than 2 Hz and lower than 55 Hz.	Supported. Pages are designed to avoid causing screen to flicker.	Pages do not have the blink element. Visual check is required.	Supported
1194.22 (m)	Web-based Intranet and Internet Information and Applications	When a web page requires that an applet, plug-in or other application be present on the client system to interpret page content, the page must provide a link to a plug-in or applet that complies with §1194.21(a) through (l).	No pages require an applet, plug-in or other application.	No applicable checkpoints	Not Applicable
1194.22 (n)	Web-based Intranet and Internet Information and Applications	When electronic forms are designed to be completed on-line, the form shall allow people using assistive technology to access the information, field elements, and functionality required for completion and submission of the form, including all directions and cues.	Partially Supported. Assistive technology cannot access the information and functions required for completion and submission of electronic forms designed to be completed on-line.	Some INPUT and LABEL elements do not use the ALT, TITLE, or LABEL attribute. LABELs need correct 'FOR' definitions.	Partially Supported
1194.22 (o)	Web-based Intranet and Internet Information and Applications	A method shall be provided that permits users to skip repetitive navigation links.	Supported. Assistive technology can skip repetitive navigation links.	Skip navigation link provided.	Supported
1194.31 (a)	Functional Performance Criteria	At least one mode of operation and information retrieval that does not require user vision shall be provided, or support for assistive technology used by people who are blind or visually impaired shall be provided.	Partially Supports. Some operations and functions for information retrieval require user vision. These operations and functions may not be available to assistive technology used by people who are blind or visually impaired.	Refer to other items marked "Partially Supported" or "Not Supported" for more information.	Partially Supported

Electronic & IT Accessibility Standard	Category	Section 508 Rule	Supporting Features	Exceptions and Remarks	Support Status
1194.31 (b)	Functional Performance Criteria	At least one mode of operation and information retrieval that does not require visual acuity greater than 20/70 shall be provided in audio and enlarged print output working together or independently, or support for assistive technology used by people who are visually impaired shall be provided.	Partially Supports. Some operations and functions for information retrieval require visual acuity greater than 20/70. These operations and functions may not be available to assistive technology used by people who are visually impaired.	Refer to other items marked "Partially Supported" or "Not Supported" for more information.	Partially Supported
1194.31 (f)	Functional Performance Criteria	At least one mode of operation and information retrieval that does not require fine motor control or simultaneous actions and that is operable with limited reach and strength shall be provided.	Partially Supports. Site does not require fine motor control or simultaneous actions, and is operable with limited reach and strength, with some exceptions.	Refer to other items marked "Partially Supported" or "Not Supported" for more information.	Partially Supported
1194.41 (a)	Information, Documentation, and Support	Product support documentation provided to end-users shall be made available in alternate formats upon request, at no additional charge.	Documentation not available.	Documentation not available.	Not Supported
1194.41 (b)	Information, Documentation, and Support	End-users shall have access to a description of the accessibility and compatibility features of products in alternate formats or alternate methods upon request, at no additional charge.	Documentation not available.	Documentation not available.	Not Supported
1194.41 (c)	Information, Documentation, and Support	Support services for products shall accommodate the communication needs of end-users with disabilities.	Customer Advocates are available to assist users with alternative communication needs.	Support services support alternative communication needs.	Supported
